HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

There is an error in the above article [1] when the components of the second order magnetostriction strain tensor $\epsilon_{\alpha}^{\mu(2)}$ are introduced in section II.B, just before equation (14). It is stated that, in the case of a uniaxial stress tensor applied parallel to the magnetic field (direction 1), the only non-null component of $\epsilon_{\alpha}^{\mu(2)}$ is $\epsilon_{\alpha 11}^{\mu(2)}$. Although the expression given for $\epsilon_{\alpha 11}^{\mu(2)}$ by (14) in [1] is correct, the 11 component is not the only non-null component of $\epsilon_{\alpha}^{\mu(2)}$. The general expression of $\epsilon_{\alpha}^{\mu(2)}$ is given by equation (1) below:

$$\begin{aligned} \epsilon_{\alpha}^{\mu(2)} &= -\frac{\partial g_{\alpha}^{el(2)}}{\partial \sigma} \\ &= \frac{9}{2} \lambda'_s \sigma_{eq} \left[\left(\vec{\alpha} \otimes \vec{\alpha} - \frac{1}{3} \mathbf{I} \right) : \left(\vec{h} \otimes \vec{h} \right) \right] \left(\vec{h} \otimes \vec{h} - \frac{1}{3} \mathbf{I} \right) \end{aligned} \quad (1)$$

The particular case considered in [1], with $\vec{h} = [1 \ 0 \ 0]^t$ and $\sigma = \sigma_{11} (\vec{h} \otimes \vec{h})$ yields:

$$\begin{aligned} \epsilon_{\alpha 11}^{\mu(2)} &= 3 \lambda'_s \sigma_{11} \left(\alpha_1^2 - \frac{1}{3} \right) \\ \epsilon_{\alpha 22}^{\mu(2)} &= \epsilon_{\alpha 33}^{\mu(2)} = -\frac{3}{2} \lambda'_s \sigma_{11} \left(\alpha_1^2 - \frac{1}{3} \right) \\ \epsilon_{\alpha 23}^{\mu(2)} &= \epsilon_{\alpha 13}^{\mu(2)} = \epsilon_{\alpha 12}^{\mu(2)} = 0 \end{aligned} \quad (2)$$

This error does not affect the following calculations presented in the article.
